

Workshop on Basics on MAYA Lighting Techniques and Tools

Topic- Basics on MAYA Lighting Techniques and Tools

Date-31-01-2019

Venue- MSIT, MATS University

A workshop on “Basics on Arnold basic techniques and tools” is organized at MSIT, MATS University for BSc (AG & GD) students. Giriraj Shankar Senapati, technical head, Anirban Studio, Pune was key speaker of this workshop. The main purpose of this one day workshop is to introduce basic and advanced techniques of Arnold Lighting Techniques. Key speaker shared a lot of things with the students. He said that understanding real world studio lighting techniques is an invaluable help in creating realistic and well-designed CG renders. Knowing classic lighting setups provides a solid foundation for a wide variety of scenes. This workshop, Studio Lighting Techniques with Arnold, demonstrated studio lighting techniques and how to render scenes as if shot in a studio. First, you'll learn all about real world lights and lighting setups. Finally, it was nice experience to listen the key speaker in this most valuable workshop. The workshop is concluded with presenting a memento by HOD, MSIT Miss. Rita diwanjee to the key speaker.
