A 23- year-old British woman was yesterday sentenced to six months in jail for leaving her two-year- old daughter home alone eight-hours-a-day, five days a week for a year while she went to work. The young mother from the central town of Warwick initially hired a babysitter, when she landed a job in a travel agency but eventually reached the point when she could not longer afford the facility, prosecutors said. The woman then started leaving the child home by herself, providing it with food and toys and removing all potentially dangerous objects from its reach. At first the mother came home at lunch time but had to stop because her daughter threw tantrums every time she left to go back to work.

The mother, who was not identified, told the Court, “if I had money I would not have done it. It was a case of that or not keeping my job and living on benefit.
