**MSIT GREEN HOUSE REPORT
ON SKIT PERFORMANCE at MARINE DRIVE**

Date: 12aug2018

SUBJECT AREAS: social issues related to environment

CONCEPT: We all can work to plant more trees and to stop destroying trees.

OBJECTIVE: To help students to think of lifestyle changes that would produce less waste and to think more about environment issues.

On 12 august 2018, MATS School of Information Technology, performed skit on the topic of "GREEN CHATTISGARH- save trees" at marine drive to support MY FM Mission 72. The distinguished guests of the program were Shri Rajesh Munat.

Sometimes environmental issues, and personal values related to them are being dealt with and clarified using self-expression and other elements of drama (learning through Drama). This method of working we call the Green Drama. The Green Drama shares values and goals with the environmental education. The ultimate goal is to transform individual actions and lifestyles to be more environmentally friendly. Students presented a skit on 'save trees'. It highlighted the dire need to care for the flora and growing more trees. The students of MSIT Green House skillfully prepared their skit on an array of issues ranging from environment. All the teams were at their creative best, the powerful performances of the budding students transported the audience to the realm of reality. The evening though was thoroughly entertaining as well as inspiring.

"Through our skit, we wanted to spread the message of conserving the environment, also we propagate to ban use of plastic bags".

We would like to express our gratitude to My FM team, Head of Department MSIT, for supporting for conducting and completion of the event.
